Professional Summary

Final-year B.Tech Electronics and Communication Engineering student specializing in Artificial Intelligence and Cybernetics, with an **8.68/10 CGPA**. Proficient in **Python, SQL, machine learning, data analytics, cloud computing and application development**. Strong foundation in analytical reasoning, numerical problem-solving, database management, algorithm development and automation, with hands-on experience building data-driven applications.

Education

Vellore Institute of Technology

Bachelor of Technology in Electronics and Communication Engineering

Specialization: Artificial Intelligence and Cybernetics

Sept 2023 – May 2027

CGPA: 8.68/10

Technical Skills

AI, Data Analytics & BI: Machine Learning, NumPy, Pandas, SciPy, Scikit-learn, Statistical Analysis, Data Cleaning, Data Interpretation, Pattern Recognition, Business Intelligence Fundamentals

Programming & Analytical Skills: Python, SQL, Java, JavaScript, Embedded C, Data Structures, Algorithms, Numerical Reasoning, Logical Problem-Solving, Root Cause Analysis

Cloud, Databases & Automation: AWS EC2, AWS S3, Cloud Computing, DBMS, MongoDB, SQLite, Relational Databases, Process Automation, Workflow Management

Application Development & Tools: Flask, React, REST APIs, Git, GitHub, Linux, Postman, Application Testing, Debugging, Technical Documentation

Experience

MPOnline Limited — Software Engineering Intern

May 2026 – Jul 2026

- Accelerated Python routine processing by **15%** through performance profiling and structured debugging in staging environments.
- Cut runtime exceptions by **25%** by analyzing database issues, isolating failure points and implementing debugging fixes.
- Authored architecture documentation and unit tests, contributing to a reported **85% baseline code coverage** and stronger software reliability.

Projects

Voice Command Shopping Assistant (VoiceCart)

GitHub | Live Demo

- Created a multilingual shopping interface using Web Speech APIs, enabling voice-based interaction in **English, Hindi and Tamil**.
- Attained **92% intent execution accuracy** in project testing using a regular-expression-based NLP algorithm to classify shopping commands.
- Streamlined browser-side state handling and interaction logic to support responsive application behavior.

Task Management Platform

GitHub

- Developed a role-based productivity platform with authentication, task assignment, workflow management and status tracking.
- Structured a **four-table relational database** with indexed keys to organize application data and support task retrieval.
- Stabilized application workflows by tracing session failures, identifying root causes and applying targeted debugging fixes.

ECG Signal Analytics & Heart Rate Estimation

GitHub

- Engineered a Python analytics pipeline to clean, process and interpret digital ECG datasets using scientific computing libraries.
- Applied a **fourth-order Butterworth filter** and numerical signal-processing techniques to suppress high-frequency noise.
- Extracted ECG peak features and evaluated heart-rate variability to generate interpretable analytical outputs from processed signals.

Publications

- Co-authored “*Smart Helmet Systems: IoT Enhanced Safety and Integrated Display for Two Wheelers*”, published and presented at ICRAE 2025, NIT Silchar.

Achievements

- TCS CodeVita Season 13:** Global Rank 1347.
- AWS Machine Learning Challenge:** Top 100; **Bharatiya Antariksh Hackathon 2024:** Finalist.

Certifications

- AWS Certified Cloud Practitioner** — Amazon Web Services.
- Applied Machine Learning in Python** — University of Michigan, Coursera.
